Office Master

DISCOVERY BACK SERIES ▶

The Discovery Back series design is TOTALLY Unique and Ergonomic. The back cushion offers incredible back support and alignment and puts the user in a correct posture position. With slight pressure in the lower back and up the spine, the user sits more upright with shoulders forced back relieving strain on the neck. The user is in a perfect posture position and breathing is much improved.

The narrow portion of the cushion fits between the shoulder blades (scapula) and allows full freedom of body and arm motion. One actually experiences 270° range of motion without interference from the back cushion.

With some models we offer a 'blended' Memory Foam seat (DCS). This seat not only conforms to the body but also eliminates pressure points to accommodate long term sitting. The seat offers a 'soft initial comfort' while giving excellent skeletal support.

All Memory Foam and Blended Memory Foam used by Office Master is a 'quick recovery foam eliminating 'Imprinting and returning to natural size and shape. We recommend using TekNit fabrics on all DB series seating.

- 90's Series:** Memory Foam Seat & Back; Fully adjustable, Tilt-Rocker, Locks at any angle; Features new 'twist & click' controls
- 70's Series:** Same as 90's series EXCEPT uses standard lever controls.
- 50' - 60's Series:** Memory Foam back; Uses Multi-Synchronous mechanism.
- 60's series** has Adjustable Lumbar
